

KILLERBY

- WESTERN AUSTRALIA -

Killerby maintains its small winery essence with most of its winemaking techniques and philosophies remaining the same since it was first established in 1973. The wine is made using small batch techniques, highest quality of French oak barriques and obsessive attention to winemaking detail.

Composition:	54% Semillon, 46% Sauvignon Blanc
Alcohol:	12.0%
Residual Sugar:	0.4g/L
TA:	6.1g/L
pH:	3.15

KEY POINTS

Vineyard:	Frankland River, situated in the remote Great Southern is home to our Ferngrove vineyard with 18 year old vines. The Margaret River fruit component is sourced from vineyards in the prestigious Wilyabrup sub region of Margaret River.
Vintage:	Overall, a good vintage for Killerby, especially against the seasonal challenges. Luckily enough the dry growing and exceptional vineyard management provided great conditions for our whites which developed a perfect balance between flavour and natural retained acidity.
Winemaking:	The fruit for the Killerby K is harvested in the cool of the early morning. The fruit is crushed, destemmed and the must is chilled to our press. The juice is then cold settled overnight and racked. A temperature-controlled fermentation follows between the range of 12 -14C. Daily ferment tastings by our winemaking team closely monitor the wine's progress. The wine is left on yeast lees for several months to improve the texture and mouthfeel. The wine is bottled young to capture the freshness and lovely fruit characters renowned for the blend of Semillon and Sauvignon Blanc.

WINE CHARACTERISTICS

Colour:	Pale straw green.
Nose:	Lifted citrus blossom, herbal cut grass and citrus peel.
Palate:	A clean and easy drinking style with lively acidity and fresh stone fruits and citrus zest.
Cellaring Notes:	Drink now.
Food Pairing:	A truly versatile wine, it is well suited to a range of seafood and chicken dishes with even a touch of spice.
